Living with a Polish family, you will have the chance to experience Polish hospitality and become familiar with Polish customs. Experienced and enthusiastic teachers, who treat their work as a genuine passion, will show you the ins and outs of the Polish language.

Polski krok po kroku is written only in Polish, as this method of presenting a new language brings the best results. It leads students into the language system in a natural way and from the very start encourages to speak exclusively in Polish. As this handbook constitutes a part of a larger interactive course in Polish, available at e-polish.eu, it can equally be used for studying on your own. The website includes comments in different languages and a multimedia dictionary, which allows you to learn without the help of teachers.

Next to each exercise in the handbook there is a number which helps you to find the exercise in the Internet course and check the answers, listen to the recordings or do alternative exercises that will help in consolidating the material or explaining any doubts you may have. A special memorisation system shortens the time necessary for learning new words and phrases. Thanks to the large number of illustrations and audio materials, learning comes naturally – as it does with children, who acquire their mother tongue by observing the world and listening to the sounds that surround them.
